INDUSTRIAL ELECTRIC MOTORS

TOOLS - POOLS - HOT TUBS

2515 Mt. Pleasant Street, Burlington, IA
319-752-4917

WE ARE SAD FOR THIS POOL SEASON TO END, BUT WE HOPE YOU HAD THE BEST SUMMER FILLED WITH FUN, LAUGHTER AND MEMORIES TO LAST A LIFETIME!

HERE ARE THE BEST PRACTICES FOR PREPARING YOUR POOL FOR COLD WATER TEMPS AND CLOSING FOR THE SEASON:

1. **IMPORTANT:** If any problems exist, such as combined chlorine, cloudy water or algae growth, clear these up BEFORE performing a winter water analysis and beginning the closing procedures.
2. **HAVE INDUSTRIAL MOTORS PROFESSIONALLY TEST YOUR WATER AND FOLLOW INSTRUCTIONS TO GET YOUR WATER PERFECTLY BALANCED SPECIFICALLY FOR COLD WATER TEMPS.**
3. Do all housekeeping chores. Brush and vacuum. Clean the waterline with Off the Wall®. Cleaning the pool surfaces before shutting down the pool will help prevent permanent staining.
4. Clean out the skimmer baskets and the hair/lint trap. If the system will not be circulated, remove and store them.
5. Chemically clean the filter using Strip Kwik® and Kleen It®. Strip Kwik® is necessary to remove oil and grease from the filter. Kleen It® should be used if you have any possibility of scale buildup in the filter.
6. **BEGIN ADDING WINTER CLOSING KIT(S): With the pump running, add the Arctic Blue® Shock from the Winter Kit(s). WAIT 1 HR THEN PROCEED**
7. **Add the Arctic Blue® Algae Protector from the kit(s) around the edges, wait 15 minutes**
8. **Add the Pool Closing Complete**
9. **Circulate for a minimum of 2-4 hours, ideally 24 hours before shutting the system down and winterizing equipment.**

MAKE SURE TO SIGN UP FOR 2026 POOL CLOSING IF YOU CHOOSE TO HAVE US WINTERIZE YOUR EQUIPMENT AND FINISH CLOSING DOWN YOUR POOL!

WE APPRECIATE YOU SUPPORTING OUR LOCAL FAMILY OWNED BUSINESS!
